CERTIFICATIONS & MANAGEMENT SYSTEMS

Kabouni maintains an Integrated Management System covering quality, environmental responsibility, and occupational health and safety across its engineering and contracting operations.

OUR CERTIFICATIONS

ISO : 9001 : 2015

Quality Management System

ISO : 14001 : 2015

Environmental Management System

ISO : 45001 : 2018

Occupational Health & Safety Management System

CERTIFIED SCOPE

Engineering, procurement, supply, installation, testing, commissioning, and maintenance of electrical, mechanical, plumbing, ELV, ICT, data center infrastructure, and telecommunication/mobile tower systems.

OUR COMMITMENT

These certifications reflect Kabouni's commitment to consistent quality, responsible environmental management, safe working practices, and internationally recognized operational standards.

03 Company Overview

Kabouni Electromechanical Contracting is a premier electrical contracting company with a proven track record of delivering cutting-edge electrical solutions across residential, commercial, industrial, and infrastructure sectors. Established in 1976, and headquartered in Damascus - Syria, we bring decades of industry experience and a highly qualified team of engineers, technicians, and project managers.

With a commitment to excellence and innovation, we undertake projects of varying complexity, delivering efficient, safe, and sustainable electrical systems that power the future.

MISSION STATEMENT

To provide high-quality, reliable, and cost-effective electrical contracting and engineering services that meet the evolving needs of our clients and contribute to safer, smarter, and more energy-efficient environments.

VISION

To be the preferred Electromechanical contracting partner across the region, recognized for our engineering expertise, innovative solutions, and unwavering integrity.

03 Scope of Services

Electrical Systems

- Medium & Low Voltage Distribution.
- Cable tray and Cable trunking installation.
- LV Switchgear.
- Earthing & Lightning Protection Systems.
- Temporary Power Solutions
- ATS - Genset - UPS
- Backup Systems.
- UPS & Inverter Solutions
ATS & Load Transfer Systems

Automation & Smart Systems

- Home and Building Automation (KNX Certified)
- Integration with HVAC, Lighting, Shutters, and AV
- Energy Management & Remote Monitoring

Fire & Safety Systems

- Fire alarm and voice evacuation systems
- Emergency lighting systems.

Lighting Systems

- Indoor, Outdoor & Landscape Lighting
- Energy-Efficient Lighting Designs
- DMX/DALI/KNX Lighting Control
- Emergency & Exit Lighting

Operation & Maintenance (O&M)

- Preventive & Corrective Maintenance
- AMC Contracts
- 24/7 Emergency Response Support

03 Our services

ELV & ICT Systems

- Structured Cabling
- Access control system.
- BGM and Public Address systems & Intercom systems.

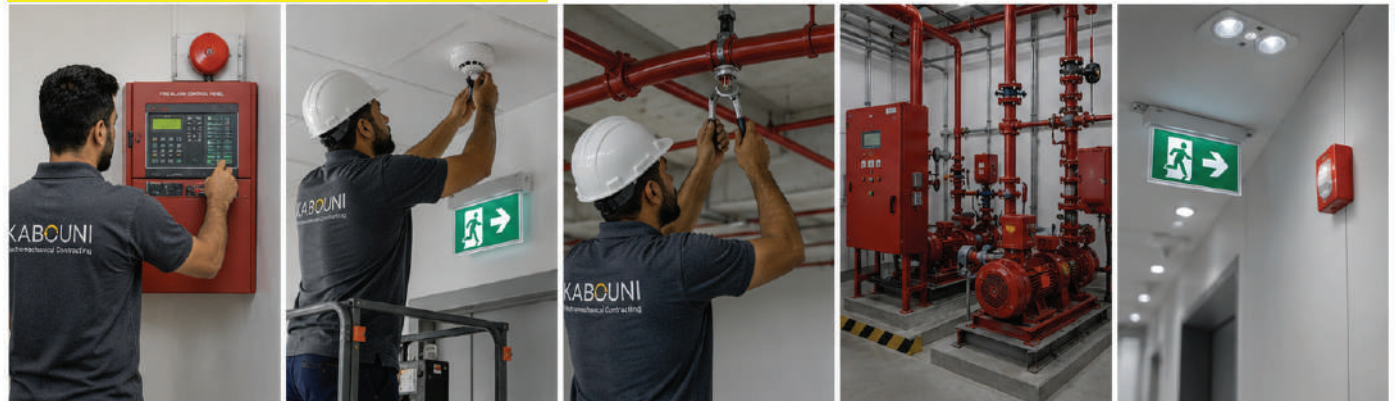

4G Mobile Network Site Construction and Installation

- Tower Installation Services.
- Network Equipment Installation.
- Electrical Systems Integration.
- Telecom Equipment Installation.

Electrical Systems

FLS Systems

03 Our services

Mechanical

Mechanical Services provide comprehensive engineering solutions, including HVAC systems, fire protection, and mechanical installations. We deliver reliable, efficient, and high-quality services that ensure optimal performance and long-term value for every project.

HVAC Systems

Heating, Ventilation, and Air Conditioning systems provide comfortable indoor temperatures, proper airflow, and energy-efficient climate control for buildings. Child water system - DX System- VRF system.

Fire Fighting Systems

Fire Pumps.
Fire Fighting Equipments (Fire Hose Reel, landing Valves, Fire Cabinets, Fire Extinguishers, Hose and Nozzles).
Sprinkler System.

Mechanical Installations

Covers the installation of mechanical equipment such as pumps, tanks, piping networks, and other building service systems to ensure reliable operation.

Ventilation Systems

These systems ensure a continuous supply of fresh air while removing pollutants, odors, and excess humidity to maintain healthy indoor air quality.

03 Our services

Plumbing

Plumbing Services provide comprehensive water supply, drainage, and sanitation solutions for residential, commercial, and industrial projects. We ensure efficient system design, professional installation, and reliable performance while maintaining the highest standards of quality, safety, and sustainability.

Plumbing Systems

Includes water supply, drainage, sewage, and stormwater systems that ensure safe water distribution and efficient wastewater management.

Building Management

Integrates mechanical systems with smart building controls to monitor performance, improve efficiency, and optimize energy consumption.

04 Our services

Elevator & Escalator Systems

Elevator & Escalator Solutions

Kabouni provides comprehensive elevator and vertical transportation solutions for residential, commercial, hospitality, healthcare, and high-rise buildings. Our services cover supply, installation, testing, commissioning, modernization, and maintenance, with a strong focus on safety, reliability, comfort, and energy efficiency.

Passenger Elevators

Designed to provide smooth, safe, and efficient vertical transportation for residential, commercial, hospitality, and high-rise buildings, with a wide range of finishes, capacities, and control options.

Hospital & Service Elevators

Reliable solutions for hospitals, healthcare facilities, hotels, and service buildings, designed to accommodate stretchers, medical equipment, service carts, and heavy-duty operational requirements.

Panoramic & Premium Elevators

Architectural elevator solutions combining advanced technology with elegant cabin finishes and panoramic designs, ideal for luxury buildings, malls, hotels, and prestigious projects.

04 Our services

Data Center Infrastructure Solutions

We provide comprehensive data center infrastructure solutions designed to meet the evolving demands of modern businesses. Our services focus on developing reliable, secure, and scalable environments that support critical IT operations. From power distribution and electrical infrastructure to efficient system integration, we ensure optimal performance, operational continuity, and long-term reliability.

Smart & Efficient Data Center Operations

Our integrated data center solutions are designed to maximize energy efficiency, enhance operational performance, and ensure uninterrupted business continuity. We deliver advanced infrastructure systems that support seamless connectivity, effective power management, and sustainable operations, helping businesses maintain secure, high-performance data environments while adapting to future technological growth.

04 Our services

4G Mobile Network Infrastructure

Kabouni has extensive experience in constructing and installing 4G mobile network sites across Syria. Our scope includes site preparation, reinforced-concrete foundations, equipment bases, shelters, fencing, and associated civil works.

We undertake the assembly and erection of steel lattice towers, monopoles, rooftop structures, antenna-support frames, platforms, ladders, cable trays, and safety accessories.

Our work also includes the installation of antennas, radio units, microwave dishes, telecommunications cabinets, feeders, fibre-optic cables, RF jumpers, grounding systems, and cable-management systems.

We provide the required electrical infrastructure, including power connections, distribution panels, AC and DC cabling, rectifiers, battery systems, generator connections, aviation-obstruction lighting, earthing, bonding, and lightning protection.

05 Our Brands

Low current

KABOUNI
Electromechanical Contracting

NOKIA

Nokia provides carrier-grade GPON and fiber access solutions designed for high-availability environments including international airports and transportation infrastructure. Its optical line terminals (OLT), ONT platforms, and IP backbone integration ensure secure, high-bandwidth connectivity for CCTV systems, operational networks, passenger Wi-Fi, access control, and critical communication systems.

SIEMENS

The Siemens BMS (Building Management System) is an intelligent platform for monitoring and controlling HVAC, lighting, energy, and safety systems. It uses Desigo CC, a scalable and open protocol-based software, to integrate all building systems into one interface. The system enhances energy efficiency, comfort, and operational control. Siemens BMS supports BACnet, KNX, Modbus, and other protocols for seamless integration. It is ideal for commercial, residential, and infrastructure projects.

Kieback&Peter

The Kieback & Peter BMS is a smart building automation system designed for efficient control of HVAC, lighting, and energy systems. Built on open protocols like BACnet and KNX, it ensures seamless integration with third-party equipment. The system enhances comfort, energy savings, and operational transparency through intuitive interfaces and advanced control logic. Its modular design allows scalability from small buildings to large facilities. Kieback & Peter is ideal for offices, hospitals, schools, and public infrastructure.

R&M

R&M (Reichle & De-Massari AG) is a Swiss family-owned company founded in 1964, specializing in high-quality, future-ready connectivity solutions.

R&M designs and manufactures reliable copper and fiber-optic infrastructure for data and communication networks, supporting data centers, smart buildings, telecom, and digital transformation worldwide.

05 Our Brands

Low current

Axis Communications AB is a Swedish manufacturer of network cameras, access control, and network audio devices for the physical security and video surveillance industries. Since 2015, it operates as an independent subsidiary of Canon Inc.

Axis Communications was founded in 1984 by Martin Gren, Mikael Karlsson and Keith Bloodworth in Lund, Sweden.

Dahua Technology is a global leader in video surveillance, offering customers a diverse range of security solutions that go far beyond just security cameras. Their product range includes everything from advanced video surveillance equipment, to access controls, alarm systems and AI-driven analytics.

The Nittan Group has been at the very forefront of the international fire protection industry since 1954 and has sales, R&D and manufacturing bases in Japan, China, Sweden and the UK. Throughout the world, Nittan has an enviable reputation for continuous innovation and exceptional quality.

Context Plus is a UK-based manufacturer specializing in advanced Fire Detection, Alarm and Suppression Systems. Established in 1984, the company provides conventional and addressable fire alarm solutions, detection devices, fire suppression systems and fire-resistant cables, with products certified to internationally recognized safety standards and supplied to over 70 countries worldwide.

05 Our Brands

Low current

A brand by Ubiquiti Networks (USA), UniFi specializes in scalable network solutions for enterprises and homes. Their product line includes wireless access points, switches, routers, and video surveillance systems. UniFi is known for its centralized controller software, which simplifies network management and monitoring. Their devices are popular for their reliability, modern design, and seamless integration, making them ideal for smart home setups and business environments.

Grandstream is an American global leader in IP communications, offering a wide range of solutions such as VoIP phones, IP PBXs, video conferencing systems, and IP surveillance cameras. The company focuses on providing affordable yet high-quality products tailored for businesses of all sizes. Grandstream's devices are known for their ease of use, interoperability, and robust performance in unified communications and networking.

The Cisco IP phone portfolio includes user-friendly, full-featured IP phones to meet the needs of your entire organization. 200,000+ Cisco collaboration customers worldwide. 2.5X IP phones shipped than our closest competitor. 95%+ Fortune 500 companies use Cisco Collaboration solutions.

Texecom Monitor offers signalling to leading Alarm Receiving Centres and is part of Texecom's suite of digital solutions specifically designed to help you grow and optimise your business. Texecom Monitor is accessed via Texecom Cloud.

05 Our Brands

Automation

basalte

A Belgian company specializing in luxury home automation systems, Basalte offers sleek and innovative solutions that blend advanced technology with modern design. Their products focus on simplicity and ease of use, ensuring a premium user experience. Key offerings include touch panels like Lisa, climate, lighting, and audio control systems, as well as seamless integration with KNX systems. Basalte is renowned for its high-quality materials, such as brushed aluminum and glass, making it an ideal choice for high-end projects.

Tense

A Belgian company renowned for its unique and high-end design in home automation solutions. Tense specializes in creating elegant and customizable touch-sensitive switches, panels, and motion detectors compatible with KNX systems. Their products are crafted using premium materials like wood, stone, aluminum, and glass, offering a seamless integration of functionality and aesthetics. Tense stands out for its ability to combine cutting-edge technology with bespoke designs, making it a top choice for luxury residential and commercial projects.

JUNG

A German company known for its high-quality home automation and electrical solutions, JUNG offers a wide range of products including switches, sockets, lighting control systems, and KNX-compatible devices. With over 100 years of expertise, JUNG combines innovative technology with elegant design, providing users with sophisticated and customizable solutions. The company's products, such as their KNX system controllers and smart home interfaces, are highly regarded for their reliability and ease of integration. JUNG stands out for its commitment to sustainability and energy efficiency, making it a preferred brand in modern building automation.

ekinex

An Italian company specializing in smart building solutions and automation, ekinex is known for its high-quality products that integrate seamlessly with KNX systems. They offer a wide range of products including switches, thermostats, motion detectors, and multimedia controls, all designed to enhance comfort and energy efficiency. Ekinex's focus is on combining advanced technology with stylish, contemporary designs using materials such as aluminum, glass, and wood. The company is committed to providing sustainable, customizable solutions for both residential and commercial applications, making it a key player in the field of intelligent building management.

thinknx

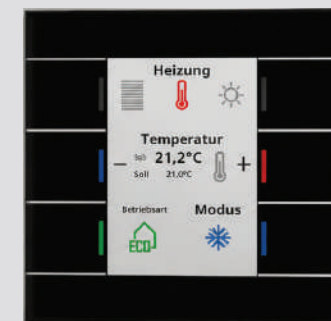

A German company focused on providing innovative solutions for building automation and control, thinknx specializes in creating advanced KNX systems that offer enhanced flexibility and user experience. Their products range from control panels and touchscreens to software solutions for managing building systems like lighting, HVAC, and security. Thinknx stands out with its emphasis on intuitive interfaces and seamless integration with existing infrastructure. The company also offers cloud-based services and mobile applications, allowing users to remotely control and monitor their systems. thinknx is well-regarded for its reliability, ease of use, and forward-thinking approach to smart building solutions.

MDT

A German company specializing in advanced KNX building automation technology, MDT offers a broad range of products designed to optimize home and building management. Their portfolio includes control panels, switches, dimmers, and sensors, all focused on energy efficiency, convenience, and security. MDT is known for producing high-performance devices with cutting-edge technology that integrates seamlessly with KNX systems. The company places a strong emphasis on ease of installation and user-friendly interfaces, making their products ideal for both residential and commercial smart building projects. MDT is also recognized for its commitment to quality, reliability, and continuous innovation in automation.

An Italian company leading provider of innovative KNX solutions, Electron specializes in creating advanced automation products for smart buildings. The company offers a variety of devices, including control panels, dimmers, sensors, and energy management solutions, all designed to optimize comfort and energy efficiency. Known for its high-quality, durable products, Electron combines modern design with cutting-edge technology. Their solutions cater to residential, commercial, and industrial applications, making them a versatile choice for KNX integration.

Iddero is a renowned Italian brand that focuses on providing high-quality KNX-based solutions for smart home automation. Their product range includes control panels, sensors, and home management systems designed to offer intuitive control over lighting, HVAC, and security. Iddero is known for its stylish designs and reliable performance, offering devices that integrate seamlessly with other smart systems. With a strong emphasis on simplicity and energy efficiency, their products are ideal for both residential and commercial installations. Iddero also offers customization options, making it an excellent choice for tailored automation solutions.

A prominent Spanish company in the smart building automation industry, Zennio specializes in designing and manufacturing KNX-compatible devices. Their offerings include touch panels, thermostats, sensors, and other automation devices, all aimed at improving energy efficiency, comfort, and security. Zennio is particularly recognized for its sleek designs, intuitive interfaces, and high customization options, which make their products suitable for both luxury and functional applications. The company is committed to offering state-of-the-art technology that integrates seamlessly with other home automation systems, ensuring a high-quality user experience.

A leading American company provides high-end smart home automation solutions, Savant is known for delivering premium control systems that offer seamless integration of lighting, climate, entertainment, and security. Focused on creating intuitive, user-friendly experiences, Savant offers a range of products including smart lighting systems, control panels, audio-video systems, and environmental controls, all designed to provide convenience and luxury. Their platforms are compatible with a wide variety of third-party devices, allowing users to easily manage their homes through a single interface.
